Topic: Carry Over Sums

In this assignment children we will do
Double Digit Addition.
Carry Over Sums

Children in this assignment we will learn
how to do Carry Over Sums. As you know how
to solve simple 2 digit sums. Let us take an example
of carry over addition sums.

Add: $47 + 33$

T O		T O
①		1 0
4 7	7	
+ 3 3	+ 3	
8 0	10	

First of all, we add the digits on Ones place, so,
add 7 and 3 on Ones place. $7 + 3$ is 10. 10 is a 2 digit
number, how to write 10. Write the digit '0' at ones
place and carry over the Tens digit 1 right above the
tens digit. Now add $1 + 4 + 3$. As you add $1 + 4$ that
is 5, now add $5 + 3$ is equal to 8. So the sum
of $47 + 33$ is 80

Example 2: Add $53 + 29$

T O	Step 1: Add $3 + 9$ in ones place
1	Step 2: Sum is 12
5 3	Step 3: Write 2 in ones place
+ 2 9	Step 4: Write 1 as carry over the tens place
8 2	Step 5: Now add the digits at tens place
	Step 6: Add $1 + 5 + 2 = 8$
	So, the answer will be 82.
