Topic: Storing Water

In this assignment we will learn about "Storing Water".

Children water can be stored in various vessels like glass, bottle, can, bucket and tanks. The vessels should be cleaned before storing water. We should not waste water as it is precious.

Sometimes there is shortage of water in some places so, people need to store water for daily activities. We cannot live without water.

Every drop of water counts. Save it!

How Can We Save Water?

Children we can save water and need to follow some simple tips.

- ★ Collect and use the rainwater.
- ★ Get the leaking taps repaired.
- ★ Do not let the taps run.
- ★ Take a bucket bath instead of a shower.
- ★ Water the plants with the leftover water in your water bottle.
- ★ Wash fruits and vegetables in a basket.
- ★ Use a bucket and mug to clean a car.
- ★ Reuse the water left after washing fruits for watering plants.

Scrap File Work

Paste pictures in which we can store water.
