

NAME: Vanun Sathothna

CLASS: X

SUBJECT: Geography

Oilseed

- constitutes very important group of commercial crops in our country.
- The important oilseeds in our country are groundnut, sesame, rapeseed, mustard, linseed, safflower, castor, sunflower, niger.

Economic Importance

- India has largest area in production of oilseeds.
- The oil of oilseeds is important part of our diet as edible oils.
- It is used as raw material to manufacture paints, varnishes, soaps, lubricants, cosmetic items, medicinal items, perfumes etc.
- The residue of oil seeds forms an important part of cattle feed and manure.
- The oil industries provides employment to millions of people.

Types or Varieties

- Edible Oilseed: Groundnut, sesame, rapeseed, mustard, sunflower and niger.
 - * some edible oilseeds are used to make vanaspati or Vegetable Ghee.
- Non-Edible Oilseeds: castor, linseed, neem, mahua.
 - * used to produce Industrial Oils and other commercial products.

Groundnut

- Both Rabi and Kharif Crop.
- accounts for about 1/2 of the major seeds produced in India.
- It is both tropical and subtropical crop.

Types of Groundnut Crop

- **Bunch Type**: grows vertically upto a height of 40 cms.
- **Runner Type**: grows horizontal and spreads over a large area and bend downwards to the ground where the seed pods grow and mature.

Soils

- grows well in light sandy loams, red and black soils.

Temperature

- grows well in 20°C to 25°C.
- warm and dry weather is important at ripening stage.

Rainfall

- needs rainfall between 50-70 cms and maximum can be 100 cms.
- continuous rain will destroy the crop.

Method of Cultivation

→ Sowing

- Sown in June and harvested before winter commences.

→ Harvesting

- harvested from October to December.
- dry and warm winter is needed at the time of ripening.

Chief Characteristics

- It is rich source of protein and Vitamin and have high calorie value.
- It is used to make Vegetable ghee (Vanaspati)

User

- Groundnut Oil is used to manufacture medicinal emulsions, artificial leather, soap and Oil requisites.
- Many sweets and savouries are made from it.
- The leftover residue of groundnut is used as cattle feed.

Area or States

- Andhra Pradesh, Telangana, Tamil Nadu, Gujarat.

* Mustard

- It is tropical crop and rabi crop.

Soils

- grown best in alluvial soil of Satluj and Ganga plains.

Climatic RequirementsTemp:

- needs cool climate from 10°C - 20°C .
- Little quantity is grown on peninsula India.

Rainfall

- requires rainfall from 25 to 40 cms.

Method of Cultivation

- grown as rabi crop.
- grown along with wheat, gram, barley.
- It takes 3 months to mature.
- It is ready for harvesting as soon as crop becomes yellow.

DATE ___ / ___ / ___

Characteristics

- It is used as cooking medium, preservatives for pickles and lubricants.

Uses

- Leaves are used as vegetables especially, carrots
- Its oil cake is used as cattle feed.
- It is also used as manure.

Area/states

- UP, Rajasthan and Haryana

DATE ____ / ____ / ____

* Soyabean

- It's a subtropical Crop.
- It can be grown on a variety of soils.
- It needs 21°C and about 100cms rainfall.

Uses

- It is used for making sauce.
- It is used as salad oil.
- It is used to produce soap, lubricant, linoleum.
- Its nuggets are used to make curries.

Areas / states

- Madhya Pradesh and U.P.
