

## Thankful Tree (Craft)

### Materials needed

- Construction paper (orange, red, yellow, green, brown and other earth tones)
- Crayons or markers
- Scissors
- Glue or a glue stick

### Steps to follow

1. Trace your hand on each construction paper. Then cut out the tracings. These will be the leaves.
2. Write your name and what you are thankful for on each handprint.
3. Using a brown construction paper, draw and cut out a tree trunk with branches. Colour it to give shading.
4. Glue or staple the tree trunk on a large piece of construction paper or onto a bulletin board. Then glue or staple the handprint leaves to the tree. Cut and glue green grass at the bottom.
5. For variation, instead of using handprints, use cut-outs of leaves, tissue paper, or torn scraps of paper to make the leaves.
