

Seasons

A season is a long period of time during a year. A season remains the same for two or more months.

Look at the pictures carefully and write below each:

1. The name of season it indicates
2. The months during which it occurs

1. February
2. March
April

1. September
2. October
November

1. July
2. August

1. December
2. January

1. May
2. June

Every year, swarms of monarch butterflies leave Mexico and fly 3,000 km to spend the summer by cool Canadian lakes.
