CLASS-III

Subject- Computers

Teacher-

Rupinder Kaur

Chapter-4 → The Internet - An Introduction

Good Morning Students,

Students, this lesson is of class 3 for the subject of Computers, Topics - 'Internet (Introduction)', 'Uses of Internet' which is covered in chapter-4,

✓

- All the students, may now please open page No-44 in front of them.
- I hope all the students are ready for today's lesson, So, let us start with topic - 'Internet - Introduction'. All students, please listen carefully.

* Children, Today, I am going to tell you about the term - 'Internet'. But, first of all, we take the term - 'Network'. In our day to day life, we observe many networks - for example - Network of telephone lines, Network of electricity wires and Network of roads - which help to connect different cities, states, capitals with each other.

CLASS-III Subject-Computers

Teacher- Rupinder Kaur

Chapter-4 → The Internet - An Introduction

We will take one more relevant example from our own body. Our body has a network of blood vessels called arteries and veins. Arteries carry blood away from the heart to the body tissue and veins carry blood back to the heart. Incidentally, the total length of arteries and veins in an average human body is about 1 lakh kilometres, which is two and a half times the circumference of Planet earth. All the arteries and veins of our body are connected to each other. This example is given to help you understand the 'Network'.

In the same way, when millions of computers are connected together, they form a network.

Now, students, I will give you two easy questions.

* write in your notebooks.

- (i) Give different examples of network.
- (ii) Which part of the body is used to carry blood back to the heart?

*

CLASS-III Subject-Computers

Teacher- Rupinder Kaur

Chapter-4 → The Internet - An Introduction

Students, the answers for the above asked questions, and the answers are:-

- (i) First answer is - Different examples of networks are - Network of roads, blood vessels, telephone lines etc.
- (ii) Second answer is - Veins carry blood back to the heart.

Internet:- Internet is defined as a global network, connecting millions of computers world wide.

When two or more computers are connected over the internet, they help us to do different things like -

- (i) we can exchange information related to text, graphics, pictures, voice-audio, and video.

CLASS-TU Subject-Computers

Chapter-4 → The Internet - An Introduction

- (ii) We can also collect information on any topic related to our interest. For example - studies, entertainment, knowledge etc.

Students, before going further, let me ask you a few questions, whose answers you may write yourself in your notebook. You may listen to the questions carefully and then pause the audio for 5 minutes to write down the answers in the notebook. The Questions are:-

- (1) Which type of information you can exchange over the internet?
- (2) Which type of information you can collect while connecting to internet?

Students, Now, we will continue with the topic. Now, you will learn more about Internet with the help of its uses. The uses are:-

Uses of Internet:-

1. News and Information :- Students, with the help of internet, you can read any newspaper and get information related to any topic of your interest;

CLASS-III Subject - ComputersChapter - 4 → The Internet - An Introduction

Such as - politics, sports, education, current events etc.

2. Art and Entertainment:- Students, With the use of internet you can enjoy watching movies, listening to songs, playing games, reading stories and books online. You can also download different movies, songs, games, stories of your choice, if you are using internet.

3. Online shopping:- Students, These days so many shopping sites providing online shopping facilities. With the help of these sites - you can purchase anything while sitting at home, without actually going there. These sites are - Amazon, Flipkart etc.

Children, Now I am ending the lesson. Read and listen to audio of assignment carefully that is explained to you, today. Learn the different uses of Internet, and try to understand the concept of Networking. Next time, I will continue with the same topic - 'Uses of Internet' that are half covered in this assignment.
