Ch- 4

Topic- "The Internet - An Introduction"

Teacher- Rupinder Kaur

Good Morning Students,

Students, this lesson is of class 3 for the subject of Computers, Topic - 'Uses of Internet' which is covered in chapter - 4.

- All the students, may now please open page No- 44 in front of them.
- I hope all the students are ready for today's lesson. So, let us start with topic - 'Uses of Internet'. All students, please listen carefully.

* children, you have already read about half of the topic - 'Uses of Internet' in the previous assignment. In this assignment you will study about more uses of Internet for better understanding of the topic. So, Next use of Internet is:-

4. Mailing letters:- In earlier days, when there was no internet and computers, people were sending their messages through post cards with the help of Post offices. But, Now

this problem of sending letters as messages has solved because of internet. By using e-mail facility you can send or receive any type of messages. Full form of e-mail is Electronic mail. You can also attach pictures, videos, and sounds with an e-mail.

5. Health and Fitness :- With the help of this facility, you can search for any remedies and precautions for different types of diseases. These days, so many doctors are available online and we can get any type of information related to our fitness and health.

6. Tourism and Travel :- With the help of this facility, you can easily book any hotel, railway ticket, air tickets in advance, without actually going to that particular place. This online booking is only possible if you are connected to an internet.

7. Chatting :- With the use of internet only, it is possible to exchange text messages, pictures, videos, audios etc. with others. For example - we use so many chatting apps these days and whatsapp is one of these apps which is ^{very} popular for exchanging messages etc.

8. Banking operations:- These days, online banking is very much in use. This facility works only because of internet. Suppose, your parents are buying something online and they have to pay money for that particular thing at the same time then this online banking operation is there for helping them. So, without visiting the bank, we can perform any type of banking operations.

9. Video Conferencing:- With the help of this use of internet ^{Business class people} very easily conduct ~~business~~ meetings for any purpose, without visiting that geographical location. For conducting such type of meetings people use ^{microphone and} web cameras. So that they can speak and see the live pictures of each other.

Students, Now, we are going to study the next topic and the topic is:-

Advantages of Internet:- There are so many advantages of internet that you will study here one by one.

1. Faster Communication:- with the help of internet you can communicate with people very easily and faster. Suppose you want to send any text messages, picture to your friend at different place, then with the help of different services of internet like - email, chatting, facebook, whatsapp etc. you can solve your purpose of sending messages.
2. Abundant Information:- Students, this advantage will help you to collect any type of information related to your interest. You can use various search engines for searching the useful information and examples for search engines are - Google, Yahoo etc.
3. Easy Sharing:- Students, like you are collecting information by using internet. In the same way you can very easily share the information with other users at the same time; if they are also connected to the internet.

4. Online Services and E-commerce:- This is the another advantage of internet. Using this internet advantage you can easily do different things like - online shopping, Ticket booking, Business deals, Money related transactions etc.
5. Cost saving:- ^{Students,} This advantage of internet will help you to save money. Suppose, you have one printer and two ^{or} three computers are connected to ~~this~~ ^{only} one printer. In any of the computer you can get the printout, only if it is connected and shared through internet. So, like this printer you can share other devices also online for example - Scanners, modems etc. This will reduce the cost of hardware.
- * Children, Now I am ending the lesson. Read ~~in~~ the assignment carefully that is explained to you. learn and write only names for all the 'Uses of Internet' and ~~also~~ write names for Advantages of Internet. Next time, you will learn about disadvantages of Internet and Basic Terminology. Thank you.
