Ch- 4

Topic- "The Internet - An Introduction"

Teacher- Rupinder Kaur

Good Morning Students,

Students, this lesson is of Class 3 for the subject of computers, Topic - 'Disadvantages of Internet' which is covered in chapter-4.

- Students, All of you, May Now Please open Page No.- 46 in front of you.
- I hope all the students are ready for today's lesson. So, let us start with topic - 'Disadvantages of Internet'. All the students, Please listen carefully.
- \* Children, In the previous assignment you have studied about 'Advantages of Internet'. Like advantages, Internet has some disadvantages also. And the disadvantages are as follows:-

1. Virus Threat :- Students, Like biological virus harm your body. In the same way computer virus harm your computer system. If you are doing work on the computer daily and using internet also for downloading and uploading of data. In this case, there are chances of virus attack. When virus enters in computer, then important data of your computer can be lost.
2. Information loss:- Students, These days people use internet for many purposes like :- Shopping, online banking etc. For using these all facilities of internet, security is required in the form of password etc. If system is not fully secure, then while using internet, people can steal the information related to bank details, credit card details etc. for bad intentions.
3. Fast spreading of wrong information:- Students, Sometimes people post wrong information on the internet that does not match with the reality of that particular topic. For example - false news, false information about anything, any person etc. In this case, so many people face different types of misunderstandings and problems.

Topic- "The Internet - An Introduction"

Teacher- Rupinder Kaur

4. Spam:- Students, when you use internet for sending e-mail and opening different apps in mobile or computers. while opening all these, some junk mails and advertisements open automatically, which are of no use. This material is treated as junk and can contain virus also which is harmful for the stored data.

\* Students, All of you, May Now take 3 Minutes break. During break time, you have to do one activity. you have to write the names for 5 items as junk food and 5 items that is useful for your body and health. Think and then write in your notebook.

\* After completing the activity you can show this list of items to your parents. They will also guide you about good and bad effects of Junk food and Healthy food.

let us continue with the next topic which is present on page No.-47 of your book and the topic is:-

Basic Terminology :- Students, while using internet, you have to learn about some basic terms of internet and these terms are as follows:-

1. Website :- A website is a collection of related web pages linked to one another. Students, like you read different subject books; These books contain so many different topics on different pages linked to one another. In the same way website is like a book which contains so many pages related to different topics.
2. Webpage :- Students, the digital page of any website is known as webpage. Webpage works like a page of the book. These pages may contain any type of information related to text, graphics, video, audio etc.
3. Homepage :- Students, the main page of any website is called Homepage. It works like a cover page of your book. By default, Home page is considered as the first page of every website. Like, without Front page or cover page a book does not look nice, In the same way without Home page no website is working properly.

4. Web Browsers :- Students, <sup>like</sup> your parents use mobile phones and they install so many apps in their mobiles for different purpose to solve. In the same way, web browser is a software application or program for using internet in the computers. web browsers are :- Google chrome, Mozilla Firefox etc. you can open these web browsers directly from the desktop that is the first screen of your computer and access the internet very easily.
5. Search Engine :- Students, As it is clear from the name of the term that is 'Search Engine' means to search for anything, any topic, any person, any place. So, it is a software that searches for any information related to any topic of your interest. Various search engines are :- Google, Bing, Yahoo etc.
- \* children Now I am ending the lesson. Read and listen to the audio of the assignment carefully for better understanding of different terms of internet. All of you will also learn and write only the names of different terms of internet and Disadvantages of internet.  
Thank you...
