## B. Write the names of internal organs in the blank space.

1. Brain
2. Heart
3. Liver
4. Large Intestine
5. Urinary Bladder

6. Lungs
7. Stomach
8. Spleen
9. Kidneys
10. Small Intestine

### CLUE BOX

Large Intestine  
Small Intestine

Kidneys 9, Urinary Bladder  
Brain 1, Stomach 7,

Liver 3, Spleen  
Heart 2, Lungs 6,

Look at the picture of the family of the Sun. The heavenly bodies that revolve in this family are called planets.

A. Answer the following questions: *Learn*

1. Which planet is called the red planet?
2. Which planet is nearest to the Sun?
3. On which planet do we live?
4. Which planet has rings around it?
5. Which is the biggest planet?

*Mars*

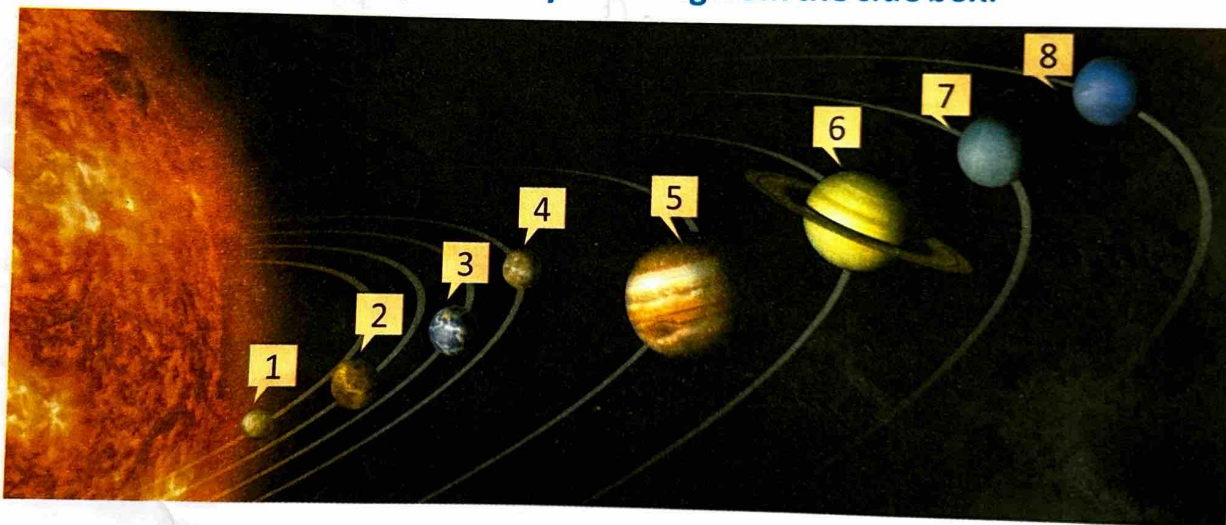

*Mercury*

*Earth*

*Saturn*

*Jupiter*

B. Write the names of these planets by choosing from the clue box.

- |                         |                        |                        |                         |
|-------------------------|------------------------|------------------------|-------------------------|
| 1. <i>Mercury</i> ..... | 2. <i>Venus</i> .....  | 3. <i>Earth</i> .....  | 4. <i>Mars</i> .....    |
| 5. <i>Jupiter</i> ..... | 6. <i>Saturn</i> ..... | 7. <i>Uranus</i> ..... | 8. <i>Neptune</i> ..... |

**DID YOU KNOW?**

- The family of the Sun consists of the eight planets that revolve around the Sun. It is called the solar system.

**CLUE BOX**

Jupiter	Neptune	Mars	Saturn
Venus	Mercury	Earth	Uranus

The Earth is our home planet that provides us with all that we need.

Answer the following questions in one word. Choose from the clue box.

*Learn Spellings*

1. Earth revolves around the *sun* to cause the seasons.
2. An year on the Earth equals to *365* days.
3. The Earth completes one rotation in *24 hours*.
4. *Antarctica* is the coldest region on the Earth.
5. The only natural satellite of the Earth is *Moon*.
6. *Asia* is the largest continent on the Earth.
7. Earth is the only planet where *life* exists.
8. Earth moves in an *oval* orbit around the Sun.
9. A blanket of air called *atmosphere* surrounds the Earth.
10. There are *seven* continents on the Earth.

## Did You Know?

- It is said that if you could put the Earth on a scale, it would weigh almost 6000 billion tonnes.

## CLUE BOX

Antarctica	Moon	Asia	Life	24 hours
Atmosphere	Seven	Sun	Oval	365
