

Good Morning Students,

Students, this lesson is of class 4 for the subject of Computers, Topic- 'web browser and its parts' which is covered in chapter 5,

- Students, All of you, May Now Please open Page No-49 in front of you.

- I hope all the students are ready for today's lesson. So let us start with topic - 'Parts of web browser'

- * Children, In the previous assignment, you have read about web browser. Today, you will study about its parts and the parts of web browser are:-

1. Back:-  Students, while using internet you open so many web pages of the different web sites. Sometimes you want to access the previous page again for

Some important information. In this, back button will help you and take you to back to the previous page of any website that you have already visited.

2. Forward :-  Students, This button will help you to take to the next page of any website that you want to access. To view the next pages in serial order, click on this button.
3. Reload this page :-  Students, Reload button works like Refresh option. Like you use refresh option for refreshing any application or your Computer desktop. In the same way, by using Reload button you can refresh the most recent version of the current page of any website that you are accessing.
4. Bookmark this page  :- Students, Generally we use book marks to highlight any page that we want to read again in future. In the same way, you visit so many ~~visit~~ web sites and you like some ^{web} pages and want to revisit these pages in future; Then this bookmark page option will help you to store and organize the chosen websites.

5. New Tab:- Students, We open different websites or webpages in so many different tabs. By clicking on this New tab button you will get different tabs for opening a link of any webpage. You can right click on the particular link and then select open link in new tab option.

6. Customize and Control Google Chrome:- Students, this button will help you to design and control different settings of Google Chrome according to you. Some of these options are present in figure-5.2 present on page no-50 in your book and the options are:- History, Downloads, Zoom, Print, More tools etc.

* Students, All of you, May now take 3 Minutes break. During break time you are going to write some questions and then will give suitable answers. Listen to the questions carefully and the questions are:-

(1) What is the difference between Back and Forward button?

(2) How can we open link in new tab?

* Now, Pause this audio for 3 minutes.

*

let me give you answers first for the Questions that I asked you before break and the answers are:-

First answer is - Back button is used to move to the previous visited page.

Forward button is used to move to the next page of any website.

Second answer is - By Right clicking on the link and select open link in new tab. Option.

* Students, let us continue with some setting options of Google Chrome. And these options are:-

(i) Print :- Students, With the help of this option you can get the prints of the current webpage that you are viewing.

(ii) History :- Students, This option will display you a list of recently visited websites.

(iii) Zoom :- Students, this option is used to increase or decrease the size of the content present on the web page. Three types of symbols we use, these symbols are ^(plus) + for Zoom in - to make the size bigger for the content. ^(minus) - for Zoom out - to make the size smaller for the content.

 - screen symbol is used to select the full screen mode.

(iv) More tools:- Students, this option more tools will provide more options like save page as, clear browsing data, task manager etc. When you click on this button , then you will be able to open these all options present there.

* children, I am ending the lesson here. Please read and listen to the audio of the assignment carefully and learn all the parts of web browser. Students, you will also try to solve ^{back} exercise present on page no- 52 & 53 that is Q:- A, B, C, D.

Thank you...
