Class - V

Date - 20.01.25

Subject - Mathematics

Teacher - Ms. Sushma

Revision - Worksheet

Q1 Find the perimeter of a rectangle

$$l = 12 \text{ m}, \quad b = 3 \text{ m}$$

Q2 Find the perimeter of a square whose side is 57 m.

Q3. A square field is 45 m long. How much distance does Namrata walk to complete one round of the field.

Q4. Find the area of a square whose side is 11.5 m.

Q5. How many square tiles of side 10 cm will be required to tile a path of dimensions 360 cm by 90 cm?

Q6. Find the length of a rectangular tile whose area is 64 sq. cm and breadth is 4 cm.

Q8. A rectangular playground has an area of 32500 sq. m. If its length is 250 m, what is its breadth?

Q9. How many rectangles can you make with an 18 cm thread?

Q10. Draw the following angles using a protractor:

(i) $\angle MNO = 90^\circ$

(ii) $\angle BCD = 100^\circ$

(iii) $\angle PQR = 135^\circ$

(iv) $\angle XYZ = 25^\circ$

Q11. Name the angles α with O as the vertex.
