Chapter - 1

The Leaf (Revision)

Teacher: Nimrita.

Good Morning students!

Today, we are going to revise Lesson-1, The Leaf. If all of you are ready, then, let us start our revision.

Q1) # Fill in the blanks:-

- 1) The wide flat portion of the leaf is known as lamina.
- 2) An example of an insectivorous plant is known as pitcher plant.
- 3) The point on the stem from where the leaf arises is known as petiole.
- 4) The central big vein of a leaf is known as midrib.

Q2) Define the following:-

- 1) Venation
- 2) Phyllotaxy
- 3) Vegetative Propagation.

Q3) Answer the following:-

- a) What are the functions of a leaf?
- b) How is transpiration important for plants?
- c) Draw a well labelled diagram of a leaf.
- d) Why are spines present on cactus?

Best of Luck!
