for young people. But regular walk can be more beneficial than any other weight lifting exercises. While walking the lungs get fresh air which is very good to clear the lungs. Sometimes people think that they can keep them fit only if they go to health clubs and do hard exercises but they are totally wrong. Though walking requires less effort but it can be as beneficial as any other exercise. Walking helps in reducing fat. Many of us are suffering with obesity. Obesity is also the root cause of many other diseases. It helps us burn calories and reduce body fat. Obesity in childhood and adolescence can be passed onto adult life. So people should be aware of benefits of walking regularly. Walking is the first step towards reducing weight. If you walk for one hour in a day it means you burn at least 300 calories. So walking is the right step to loose your weight.
