Pollution: Preventive measures

1) Pollution Prevention

It is the technique to reduce or eliminate pollution at source.

2) Preventive measures

(a) carpooling

- It is the sharing of car journeys so that more than one person can travel
- It helps to reduce Air pollution, fuel and also reduces traffic congestion.

(b) promotion of public transport

- It helps to reduce Air pollution, traffic congestion, fuel etc
- better public transport shows development level of Country.

(c) No Smoking zone

- No Smoking zones should be maintained in all public areas like school, colleges, Hospitals etc.
- This will also help to reduce pollution.

(d) Restrict use on fossil fuel:

- The use of fossil fuels should be reduced.
- This will help to save fuel and reduce pollution.
- dependency on fossil fuels can also be reduced by use of EV cars and promotion of Public Transport and also carpooling.
